NUMBER 235

Mr. Cleveland is a graduate from the most powerful college on the globe—the electoral college.

The republicans of California want to elect Mr. Blaine senator for that state. Mr. Blaine doesn't propose to desert Maine.

It is more than likely that congress will end its session giving General Grant a pension of five thousand dollars a year. A sense of common decency ought to compel congress to do this thing.

There are growing indications that the democrats will have no mercy on republican office-holders or on the enemies which the economy of the republican party has accumulated.

Judging from numerous Washington dispatches the democratic office seekers are having a hilarious time in marching up and down again. It won't be so funny when they have to march down again.

Here is a bit of news that the administrators of the laws in the United States should profit in reading: Alexander Burtin, a millionaire paper manufacturer at Montreal, has just been sentenced to ten days in the common jail for defrauding a widow.

Our democratic friends—the press—seem to be anxious about Blaine four years hence. Please give Mr. Blaine a rest. If the democratic party takes as good care of itself during the next four years as Mr. Blaine will take care of him self, it will do much better than is expected.

A STORY OF REMARKABLE AFFECTIVENESS.

The legislatures of Alabama, Georgia, South Carolina, Vermont and Virginia are in session, and that of Idaho will convene next Monday. As had been expected, Mr. Pugh has been returned to the United States senate from Alabama. The Corbett assumes to say, and probably it is not far from right, that the workingmen of these commonwealths can get more satisfaction in these assemblies than they will ever receive at the hands of congress. There is no laboring or commercial reform that cannot be originated in the state itself.

Statistics just collected, prove that a larger business is done by telegraphic companies in the United States than in any other country in the world. Over 40,000,000 messages were sent last year. Great Britain sent nearly 33,000,000, France 26,000,000, and Germany 18,000,000; the total for the world was 153,000,000; fully one-half were sent in English-speaking countries. Germany has nearly as many telegraph offices as the United States, although so much smaller in area, and doing less than half the business. Great Britain, on the contrary, does a larger business with comparatively few offices.

The American Methodist centennial conference will assemble next week in Baltimore, where it was organized one hundred years ago. Methodism was really introduced in 1765, but the revolutionary war delayed formal organization. The first conference was held in Baltimore in December, 1784, with fifty members present, and lasted several weeks. Revs Thomas Coke and Francis Asbury were chosen bishops, and twelve others and one deacon were ordained. The coming conference will be composed of about six hundred delegates, representing the following churches: Methodist Episcopal, Methodist Episcopal South, African Methodist Episcopal, African Methodist Episcopal Church, Colored Methodist Episcopal, African Methodist, Primitive Methodist and Independent Methodist. Three branches represent a membership of 3,600,000, with 22,845 regular ministers.
